Traffic Light Widgets

In most cases, it's not easy to create a native traffic light in Excel. You can use conditional formatting, shapes, named ranges, and linked pictures; if you are not in a hurry. As always, manual chart preparation is a time-consuming task for Excel users. Furthermore, this method is a little bit risky; you should avoid misspelled formulas, incorrect data inputs, and so on. We provide a ready-to-use solution to boost your productivity.

How to create a new Widget?

Click on Traffic Light Widget icon on the ribbon

Add a chart name

A screenshot of the 'Traffic Light Widget - Excel Dashboard School (c)' configuration dialog box. The 'Chart Name' field is circled in green and contains the text 'PROJECT 1'. Below this, the 'Format' section has radio buttons for 'Number' (selected), '%', 'Currency', and 'Decimal'. The 'Zone Setup' section has three rows: Zone1 with values 0 and 30, Zone2 with 30 and 70, and Zone3 with 70 and 100. The 'Actual' value is set to 55. The 'Color Setup' section has three rows with color swatches and '+' buttons. The 'ForeColor' and 'Border' sections have color swatches and '+' buttons. The 'Type' dropdown is set to 'TL_V1'. At the bottom right, there are 'Create', 'Delete', and 'Close' buttons.

Zone Setup		Color Setup	
Zone1	0 30	[Red]	+
Zone2	30 70	[Yellow]	+
Zone3	70 100	[Green]	+

Actual: 55

ForeColor: [Black] + Off Light [Black] +

Border: [Grey] + Text: [White] +

Type: TL_V1

Create Delete Close

Add values for zones and customize the widget colors. Finally, add a linked cell to Actual Value.
