

Ultimate Dashboard Tools 10 for Mac Add-in Installation Guide

When you have downloaded the package, you should have to extract the zip file content. Use the built-in Archive Utility to unzip the package.

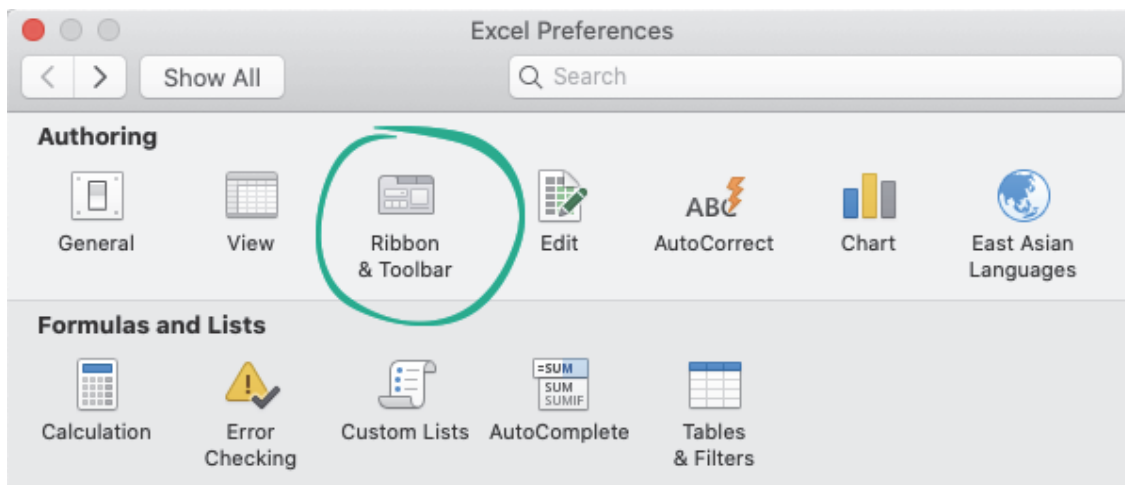

To install the add-in, you need to enable the Developer Tab on the Ribbon. If the Developer tab is not available, do the following to display it:

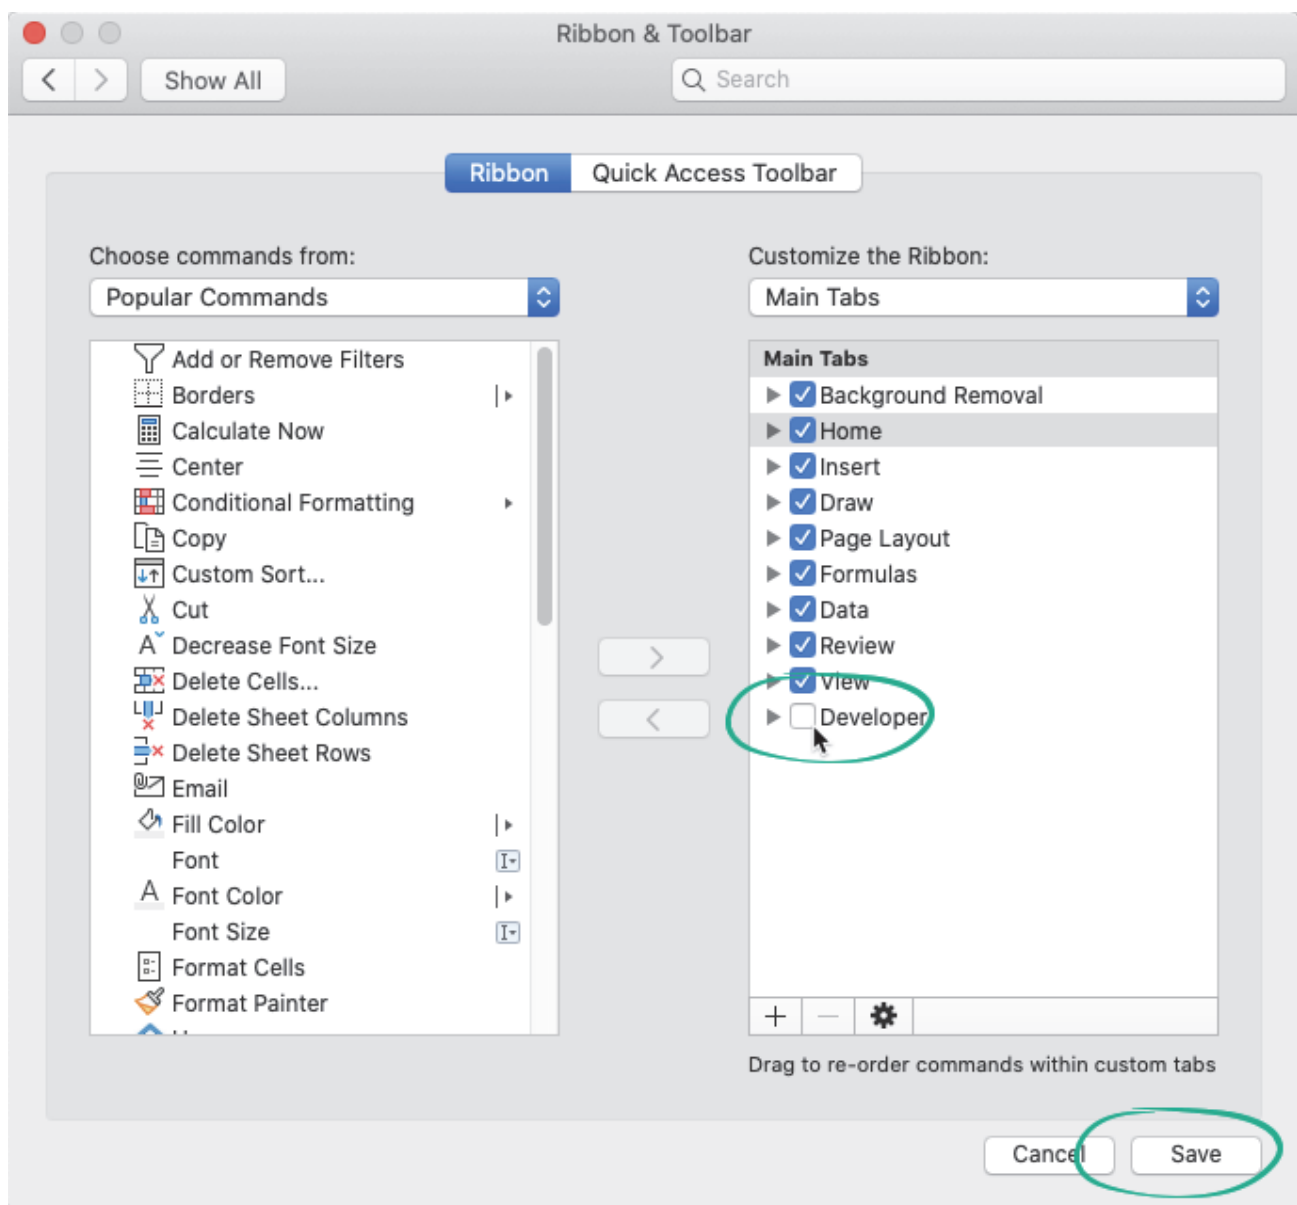

Select Excel > Preferences

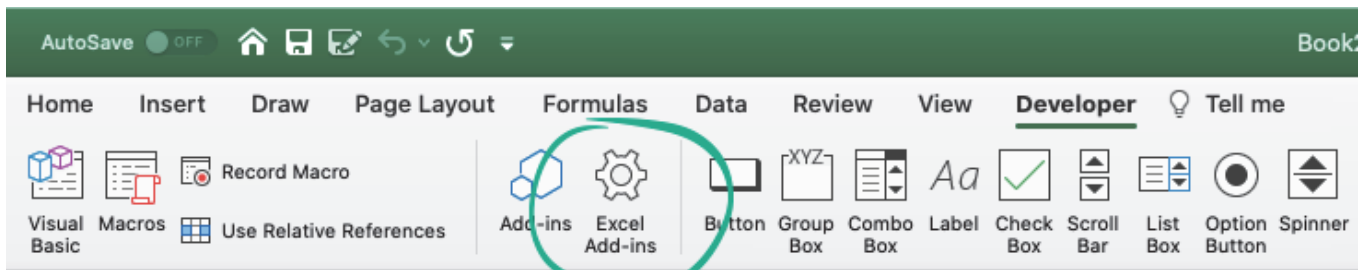

Select the Ribbon and Toolbar option

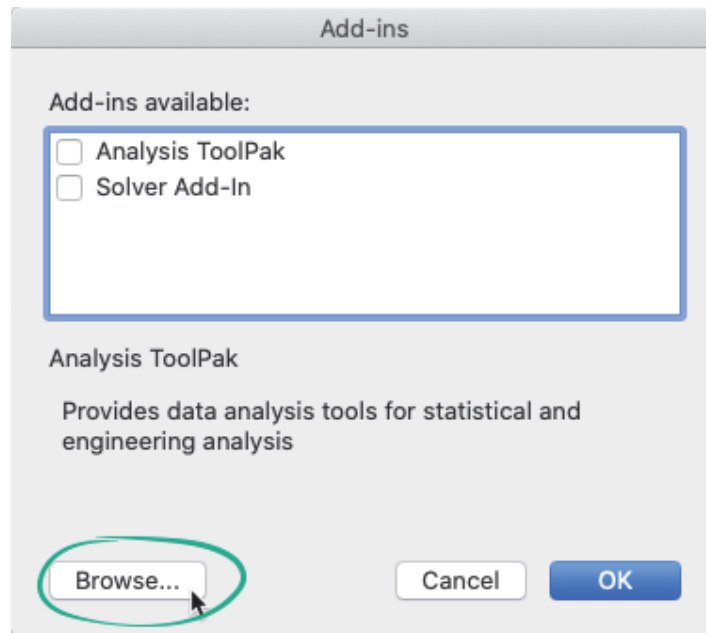

Under Customize the Ribbon, select Main Tabs and then check Developer: Click Save and then close Excel Preferences.

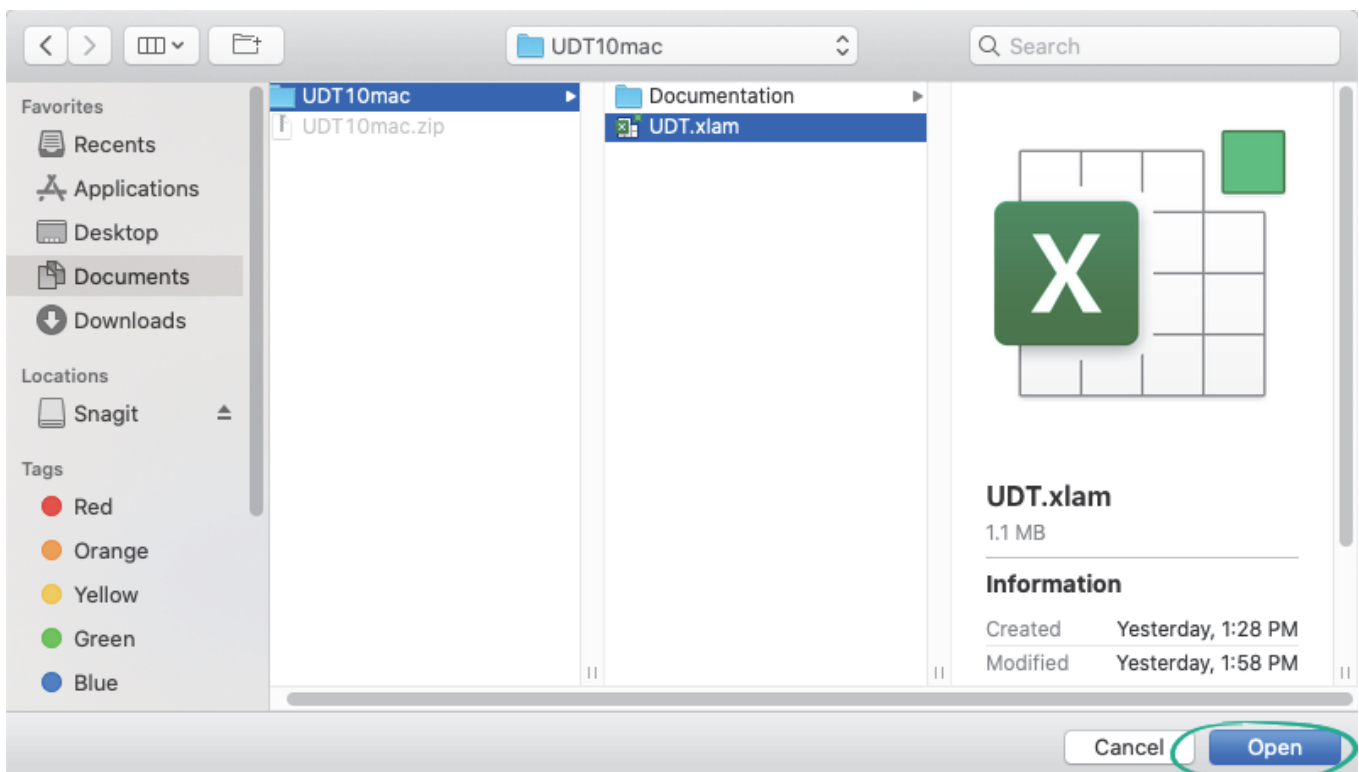

The Developer Tab is enabled. Click Excel Add-ins

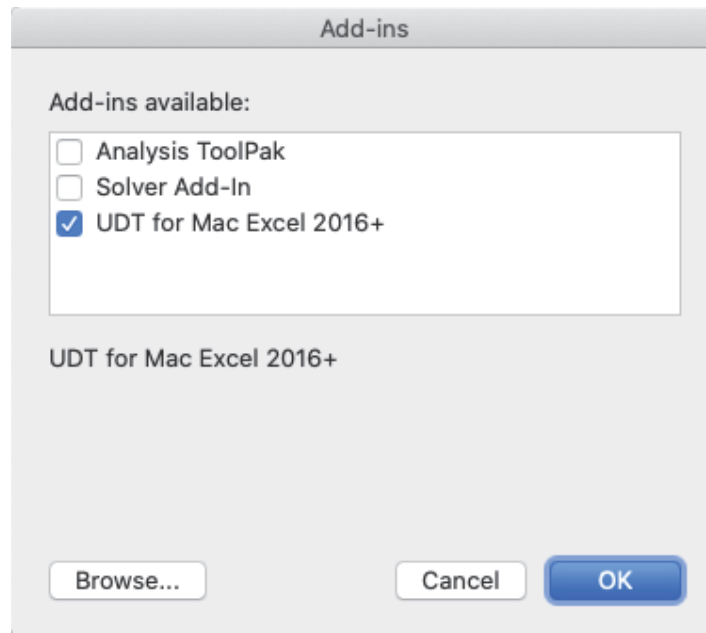

The Add-Ins dialog box appears. Click Browse to locate the add-in.

Select the UDT.xlam file and click Open.

The add-in should appear in the Add-Ins available box.

Click OK.
