

Traffic Light Widgets

In most cases, it's not easy to create a native traffic light in Excel. You can use conditional formatting, shapes, named ranges, and linked pictures; if you are not in a hurry. As always, manual chart preparation is a time-consuming task for Excel users. Furthermore, this method is a bit risky; you should avoid misspelled formulas, incorrect data inputs, etc. We provide a ready-to-use solution to boost your productivity.

How to create a new Widget?

Just click on Traffic Light Widget icon on the ribbon

Add a chart name

Traffic Light Widget - ExcelDashboardSchool.com (c)

Chart Name:

Format

☒ Number ☐ % ☐ Currency ☐ Decimals

Zone Setup

Zone1	<input type="text" value="0"/>	<input type="text" value="30"/>
Zone2	<input type="text" value="30"/>	<input type="text" value="70"/>
Zone3	<input type="text" value="70"/>	<input type="text" value="100"/>

Actual Value:

Color Setup

Fore Color	<input type="color" value="#000000"/>	<input type="button" value="+"/>	Off Light	<input type="color" value="#000000"/>	<input type="button" value="+"/>
Border	<input type="color" value="#808080"/>	<input type="button" value="+"/>	Text	<input type="color" value="#FFFFFF"/>	<input type="button" value="+"/>

Type:

Widget Manager

Add values for zones and customize the widget colors. Finally, add a linked cell to Actual Value.
