Cycle Plot (Panel Chart)

A cycle plot shows both days of the week/month of the year effect and trend/cycle in data. Cycle plots separate each series into its own section. William Cleveland and his colleagues created cycle plots in 1978 at Bell Labs.

How to create a cycle plot?

Select the range which contains data. Click on the cycle plot icon on the ribbon. A small window will appear.

Choose your preferred layout and click OK.

UDT CyclePlot Setup

Select the data to plot
cycleplot!\$C\$3:\$I\$8
